

ABOUT US

Established in 1971, Valley Radiology Consultants offers an advanced array of diagnostic imaging and pain management through our locations in San Diego County. Our board certified radiologists are accompanied by technologists and support staff committed to providing you high-quality care.

We've designed this Web site to help our patients learn about the procedures we perform, to help them prepare for examinations and treatments, and to introduce them to our staff of distinguished medical professionals. This site also contains a section to guide referring physicians in accessing online services. Click here to view information [about our physicians](#).

MISSION STATEMENT

Excellence in diagnostic imaging services focused on uncompromised patient care, referring physician satisfaction and commitment to the community we serve
